DETAILED ACTION

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a bifocal contact lens or IOL that has an upper zone of optical power and a lower zone of different optical power that are connected by a transition where the upper zone and the lower zone together with the transition form a bifocal area that is monocentric and the transition zone comprises a family of curves with an upper and a lower boundary and having a plurality of sigmoidal shapes, where the lens provides a wearer with vision that is free of image jump.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schneider et al ('318) and ('500) both teach a bifocal IOL with a

transition area, but do not teach or suggest the claimed limitations. Porat is cited to show a bifocal contact lens having upper and lower focal regions.
